

HCV Treatment outcome

Outcome	Definition
Cured	patient completed the planned treatment duration and SVR12 not detected
Failure	patient completed the planned treatment duration and SVR12 detected
LTFU	patient not completed the planned treatment duration (regardless of HCV VL result after RTC)
Dead	patient died while on treatment or after completion of treatment before SVR12
Stop for other reason	treatment stopped by MD for other clinical or non-clinical reason (e.g., pregnancy, TB)
Completed but no outcome	patient LTFU after treatment completion and hence no SVR12
